

# Information pack for parents

## ▶ ClickView

The Victorian Department of Education and Training (DET) and your school are using online learning services to support learning and teaching.

### What is ClickView?

ClickView is an educational video platform that all Victorian government secondary and P-12 schools can access as part of the DET Secondary School Software Suite. Through ClickView students have online access to thousands of educational programs, movies and TV shows to support the school's curriculum and students' learning. This means that students can easily access videos for classroom tasks, assignments or research, in a safe environment.

#### High-quality resources for learning

ClickView provides a library of video content explicitly aligned to the Victorian Curriculum. Students and teachers can confidently access high-quality video resources that have been purpose-made in Melbourne, or educationally curated from a selection of pay-TV or free-to-air programs.

#### Safe and age-appropriate

ClickView resources feature Australian content classifications to help ensure students are accessing age-appropriate materials.

#### Engaging and interactive

Teachers can find, edit and share relevant educational videos with students, including interactive learning tasks, through which teachers can monitor each student's understanding. Students can upload and share their work with teachers and other students to demonstrate their learning.

#### Access videos from home on any device

Teaching staff can share clips with students to view at home so they can use class time for quality discussions, higher-order thinking and problem-solving.

ClickView can be conveniently accessed on laptop, desktop, tablet or mobile devices.
